ENVISION HEALTHCARE
Unlock the Potential of Your Clinical and Claims Data

Envision Value-based Analytics (EVA) translates your claims, health plan and patient encounter data into specific actions and interventions. We help you make vital connections between clinical and financial data to drive value, improve the patient experience and support your value-based arrangements.

How We Turn Analytics into Action

Patient Care Delivery → Secure Data Acquisition → Data Assessment → Consultation & Care Design → Resource Deployment → Analytics and Quality Assessment → Continuous Process Improvement → (back to Patient Care Delivery)

Achieve Your Clinical and Operational Objectives

Bringing the clinicians to the table, process efficiency, clinician/bed-side forward processes, clinician satisfaction & engagement, change at point of care to enhance outcomes

- Bridge communication gaps between physicians, clinical support and leadership
- Improve care efficiency and address social determinants of health
- Reduce costs by helping clinicians work smarter
- Gain insights into program KPIs
- Understand patient communication trends

Let's Talk

Are you searching for secure data analytics solutions for value-based care? As part of Envision Healthcare, a leading national medical group, our EVA team combines clinical expertise with healthcare analytics and deep experience in data-driven solutions.
